

Technical sheet BUSYPOD

BUSYPOD phone booth is the best solution to ensure privacy towards the surrounding environment and tranquility in a context of modern open space offices or in coworking spaces.

BUSYPOD responds to the increasingly frequent need for an isolated and acoustically comfortable place to make a phone call, follow a webinar or to set up a video conference without disturbing colleagues, and allows you to isolate yourself from the outside environment to concentrate better.

BUSYPOD phone booth solves all these needs: it creates a quiet work area in the most chaotic environment, effectively attenuating the background noise typical of an open space office, a coworking space or a lounge area.

The acoustic coatings on the internal walls create a perfect muffled environment, ideal for telephone conversations or video calls, ensuring the intelligibility of speech. The sound insulation of the **phone booth** reaches a level of 32 dB thanks to the coupling of two wooden panels with rock wool inside them.

It is possible to customize the internal walls in antibacterial and ecological **Feltouch** felt of the **BUSYPOD** phone booth thanks to the range of 5 colours available (light gray, dark gray, green, yellow and blue).

The external side walls in wood also have a painted metal sheet coating that can be customized by choosing from the countless colours of the RAL colour scale.

BUSYPOD can be moved comfortably thanks to the small invisible wheels present under the cabin base.

Standard sizes

External size: W 101,9 x D 101,9 x H 226,3 cm

Internal size: W 87 x D 90 x H 203 cm
